Education

Indian Institute of Information Technology Senapati(IIIT), Manipur	**Aug 2018 - May 2022**
Bachelor of Technology - Electronics and Communications Engineering (ECE)	*Senapati, Manipur*
CPI	*8.20 / 10*

Skills

- JAVA
- Spring Boot
- SQL
- JSP
- C++
- OOPS
- HTML
- CSS
- JavaScript
- AWS
- React JS
- Operating System
- Linux
- DBMS
- Git
- Node JS
- Express
- EJS
- MongoDB
- Angular

Experience

Massive Mobility   **September 2023 - Present**

Full Stack Developer   *Gurgaon, India*

- Pioneered the development and seamless implementation of a cutting-edge two-way communication framework between chargers and the spring boot server, React JS on the frontend significantly elevating the system's operational efficiency.
- Championed the integration of the sophisticated PhonePe payment system, adding a touch of finesse to transactional processes at charging stations. Simultaneously, played a key role in the refinement of billing calculation functionalities.
- Led the implementation of diverse messaging protocols via OCPP, including HeartBeat, Change Configuration, and Change Availability, contributing to a robust communication infrastructure and bolstering system reliability.
- Worked on AWS EC2 and AWS S3 for deployment purpose.
- Worked in Agile Environment

Anukta IT Solutions   **July 2021 - Sep 2023**

Software Development Engineer I   *Telangana, Hyderabad*

- Implemented cutting-edge performance optimizations on the website, resulting in an impressive 72 percent reduction in loading time.
- Accumulated valuable expertise in crafting efficient and scalable code, strategically employing object-oriented programming principles and industry best practices.
- Played an integral role in collaborative problem-solving sessions, actively engaging with cross-functional teams to troubleshoot issues and implement innovative solutions, fostering a culture of collective success.
- Contributed to the proof of concept (POC) phase and wrote test cases using Cypress, ensuring high code quality and efficient testing processes.

Projects

HungerHub - Online Food Delivery App | *Java, Spring Boot, MySQL, React JS, Redux*   Dec 2023
- Developed Food Delivery webapp with Spring Boot, prioritizing robust backend and RESTful APIs.
- Integrated MySQL for efficient data management, ensuring seamless user order handling.
- Implemented Stripe payment gateway to facilitate secure and reliable payment processing, enhancing user experience and enabling seamless transactions.
- Managed user authentication and authorization using Spring Security, ensuring secure access control for both administrators and regular users and used Redux for state management.

RapiBuy | *React JS, Node JS, Express JS, Mongo DB, CSS, Redux*   Aug 2023
- Led end-to-end development of "RapiBuy" e-commerce platform using MERN stack.
- Implemented Redux for state management, MongoDB for data storage, and JWT for user authentication.
- Created admin dashboard for inventory control, order tracking, and user engagement analysis.
- Integrated Razorpay and PayPal payment integration.

Awards and Certifications

- Achieved top performer status in the Coding Ninjas DSA Course, mastering essential Data Structures and Algorithms concepts.
- Passed the LinkedIn Assessment in HTML, CSS, and Node.js, ranking in the top 5 percent among 454.2k participants.
- Achieved top 5 percent ranking among 926.6k participants in the LinkedIn Assessment for React.js.
